The program of «Improving qualification of teachers for pedagogical specialties of university in the field of modern technologies of teaching and learning» is held at «The National Center for Professional Development «Orleu» in Almaty city.

In the annual message of the President of the Republic of Kazakhstan Nursultan Nazarbayev to the people of Kazakhstan «The Socio-economic modernization – the main direction of development of Kazakhstan» multilingual education is prioritized as «one of the most important values», as the main beneficial feature of our country is a multicultural and multilingual society.

In accordance with the objectives set by the President in the State Program for Development of Education of the Republic of Kazakhstan for 2011-2020., The State program of functioning and development of languages for 2011-2020 and Cultural program «The Trinity of languages» in 2020 all the people of Kazakhstan should master the Kazakh, 95% of population- Russian and 25% of population-English.

In conditions of updating the content of education has increased the need for a teacher, who has the ability to modernize the content of his activities through the critical, creative development and its application for science and teaching experience. The relevance of education modernization explains by the rapid spreading of various innovations, including new educational technologies on the one hand, and insufficient knowledge of them by teachers, on the other. The use in teaching of effective educational technologies allows teachers to increase the motivation of students and to achieve better results in professional teaching.

The course is aimed to improving a qualification of university' teachers (lecturers) of pedagogical specialties in the field of modern technologies of teaching and learning, to increase the competitiveness of the higher education system of the country.

Objectives: developing habits in designing and modeling of professional activities in teaching, scientific research and the ability to manipulate the flow of information.

Certification of listeners is carried out by the system of assessing knowledge, received in the result of learning, including indicators:

- Knowing and understanding by listeners the main conceptions and issues in the range of learnt teaching modules of given program;
- Analytical habits, attained by the learners in the result of learning and independent work;
- Ability to think problematically, form problem tasks, situations.
- Professional self-analysis and self-assessment;
- Existence of presentation skills with consecutive representation of a material with comments and explanations, ability to structure information.
- Protection of a portfolio the reflexive report - the essay according to contents of the program of a course, fragments of studies on the basis of the received knowledge, additional resources on actual problems of this program, personal plans of further self-education.

The course consisted of four connected modules. The content of modules is as follows:

- *Module 1 «Modern approaches in the system of continuous (uninterrupted) Education»*
- *Module 2 «Technologies of self-development, self-improvement, self-realization»*
- *Module 3 «System of assessing the results of education»*
- *Module 4 «Modern information (digital) technologies in teaching and learning»*

During the courses it is necessary to pass on-line tests for each module, entry test and while starting full-time education we were supposed to take an interview in English. In the end of the course we are to prepare and defend a portfolio for our final work and to prepare the analytical report.
